Request description I would like tabular data of the county eligibility for the Livestock Forage Disaster Program for 2012 – 2021. Tabular data are available for 2022 on the FSA website, as are PDF maps of eligibility for 2014–2021: <https://www.fsa.usda.gov/programs-and-services/disaster-assistance-program/livestock-forage/index> I would like the county eligibility tabular data for past years. These data include fields for Pasture Type, Date of Qualifying Drought, FSA State, County Name, State & County Code, and Payment Factor (or number of Eligible County Payment Months). Thank you.

Fee waiver yes

Explanation	My colleagues and I at the Montana Climate Office in the University of Montana are working on an academic research project where we are modeling how Livestock Forage Program eligibility might have looked different given different ways to define drought conditions. This research is likely to contribute significantly to public understanding of the impact of drought declarations on US Federal public relief programs such as those administered by the FSA. Our office declares no commercial interest in this research.
